

# Delta Tech Timely Warning Policy

Delta Tech wants everyone to be alerted promptly to potentially dangerous criminal situations so that our students, faculty and staff have both the time and the information needed to take appropriate precautions. Therefore, Delta Tech will alert our students, staff and faculty via in-house email, PA announcements, posted notices and/or text messages of criminal acts reported to the institution and verified as potential threats on our property or adjacent properties. These notifications will include all crimes relevant to the Federal Jeanne Clery disclosure of campus security policy act of 1998 but are not limited to crimes covered in the Clery act. In general criminal activity that possess potential risk to the Delta Tech community will be reported using one or more of our campus communication methods (in-house email, text systems, PA announcements or posted bulletins). The decision on which communication method will be made is on a case by case bases depending on the risk associated to the members of our institution. Delta Tech works in full cooperation with the Lake Charles Police Department as well as state and Federal officials.
